

# Muni Bhasker V

DevOps Engineer

## CONTACTS

- munibhasker88@gmail.com
- +91 8553565639

## EDUCATION

May 2017

Bachelor's of Science in  
Computer -  
Bangalore university,  
Karnataka, India

## SKILLS

### Professional

- DevOps Automation and CI/CD Pipeline Management
- Cloud Infrastructure Management (AWS & Azure)
- Infrastructure as Code (Terraform, CloudFormation)
- Containerization and Orchestration (Docker, Kubernetes)
- Configuration Management and Automation (Ansible)
- Monitoring,

## PROFILE

Overall Experience 5. 1, DevOps Engineer with 3 years of experience in DevOps Automation, Cloud Technologies, and CI/CD processes. Proficient in AWS and Azure infrastructure, Terraform, Docker, and Kubernetes, with a strong focus on automation and high availability. Skilled in Jenkins, Git, and Ansible for seamless CI/CD pipeline management and infrastructure deployment.

## WORK EXPERIENCE

### DevOps Engineer | Fujitsu

2022 - Present

Extensively built AWS infrastructure from scratch using Terraform and CloudFormation, creating robust and dynamic modules for services like S3, IAM, Lambda, ECS, CloudWatch, and Systems Manager.

- Built and managed AWS infrastructure from scratch using Terraform and CloudFormation, significantly improving deployment efficiency and scalability.
- Automated deployment and configuration of AWS resources, including VPC, EC2, ALB, NLB, and S3, enhancing system reliability and performance.
- Developed robust Terraform modules for various AWS services, reducing manual intervention and operational overhead.
- Implemented containerization of applications with Docker and orchestrated microservices using Kubernetes, ensuring high availability and streamlined operations.
- Utilized Ansible for configuration management, automating the setup of worker nodes and improving consistency across environments.
- Managed version control with GitHub and created monitoring scripts to proactively identify and resolve issues, ensuring smooth application functionality.
- Configured Squid proxy, SSH, Apache Web Server, and DNS to bolster system security and accessibility.

Troubleshooting,  
and Version  
Control

**AWS DevOps Engineer | NU Technology Inc**  
**Feb 2021- Sep 2021**

## **Software**

- AWS and Azure Cloud Services
- Jenkins, Git, and GitHub
- Docker, Kubernetes, and Maven
- Monitoring Tools (Prometheus, Kibana, Grafana)
- Project Management and Tracking (JIRA)

- Leveraged AWS services including EC2, S3, VPC, ELB, IAM, Route 53, CloudFront, CloudWatch, CloudFormation, Lambda, and API Gateway for robust cloud infrastructure management.
- Spearheaded CI/CD processes using Git, Maven, and Jenkins, automating build and deployment pipelines to accelerate release cycles.
- Created and managed Docker images and containers, utilizing Dockerfiles to ensure efficient and consistent deployments.
- Employed Jenkins for end-to-end automation, streamlining software release processes and minimizing downtime.

**Data Analyst | Concentrix**  
**2019-2020**

- Conducted background verification for US citizens, managing data collection and analysis to ensure accuracy and compliance.
- Coordinated with clients and applicants to verify and correct information, enhancing data integrity and reducing errors.
- Managed production and quality reports, followed up with vendors, and maintained workflow efficiency through detailed reporting.

**Data Analyst | Trainerkart Learning Solutions**

**Apr 2018 - Oct 2018**

- Managed the Import Payable Tracking System process, performing data entry for goods invoices and ensuring document safety and accuracy.
- Prioritized invoice documents and approvals, improving processing efficiency and accuracy.
- Trained new employees in technical support, supported client locations, and ensured up-to-date documentation and proofs.
